WORK EXPERIENCE

Applore Technologies | 803, Pegasus Tower, Sector 68, Noida

Dec 2023 - present

Senior Developer

Technologies Used: Next.js, Node.js, Express.js, TypeScript, Microservices, CronJob React.js, MongoDB, FireBase, TailwindCSS, GSAP, Material-UI, Socket.io, rajorpay, shadcn, GraphQL

- **SHARBUY [Live]**: Developed an innovative **AI-powered supply chain solution** for electronics, using **Next.js**
- Attracted over **7,000 vendors** from **India and China**, showcasing more than **10 million products** in its initial launch phase
- Featured **real-time chat** using **Socket.io**, enabling seamless communication and bidding while efficiently handling race conditions to benefit the supply chain
- Integrated **SonarQube** to improve code quality and SEO, leveraged **GSAP** for an interactive and engaging user interface
- Used memoized components to achieve a **30% reduction in page load times**.
- **NIRANTARA [Live]**: Spearheaded **Nirantara Admin Portal [Live]**, a **Next.js** trip-based emission calculating platform, attracting **250+ organizations** and managing over **1200+ daily trips**
- Designed a **real-time dashboard** with interactive charts, emission insights, and trip management tools
- Integrated advanced CO₂ estimation algorithms and **role-based access controls**, ensuring accuracy, security, and scalability
- Enhanced user experience with global emission maps, modular setups, and seamless facility management for organisations worldwide

Saitec International Computer Consultants | Sector 63, Noida

Mar 2022 - Dec 2023

(Full-Stack Developer)

Technologies Used: React.js, TailwindCSS, MongoDB, Next.js, Express.js, Node.js, GSAP, Socket.io

- **Project Management Software [Live]**: Developed modules for **Admin, HR, Manufacturing, Invoice, and Procurement**, enhancing productivity with **real-time task assignment**, tracking, and data-driven insights.
- **Event Application [Live]**: Delivered a **secure platform** for ticket selling, event registration, and marketing solutions. Implemented **robust payment gateways** and analytics for tracking event performance.
- **Magic Software [Live]**: Designed a **centralized platform** for business data management with secure authentication. Enabled efficient collaboration through **customizable dashboards** and reports.
- **Varun Beverages [Live]**: Created an **All-India order-punching portal** with dynamic dashboards for **Visitors, Distributors, and Admins**. Optimized backend systems to handle high transaction volumes seamlessly.
- **India Post Office [Live]**: Developed a **real-time Post Tracking System** integrated with geolocation services. Streamlined tracking processes, enhancing operational accuracy and customer satisfaction.
